WORK EXPERIENCE

Interapt's Software Engineering Immersive (SEI) Program   July 2023 - Present
- Developed proficiency in full-stack web development, including HTML5, CSS, and JavaScript.
- Gained expertise in Java, Spring Boot, and relational databases, with a focus on REST APIs.
- Acquired skills in Angular, TypeScript, and front-end development principles.
- Mastered full-stack web application development, emphasizing UX/UI design, Agile methodologies, data-driven usability enhancements, iterative testing, and fostering a creative and collaborative mindset.

Instructor | Apple and 100 Black Women's National Coalition   Summer 2023
- Managed a summer coding camp that empowered 30 young Black girls to code in Swift, resulting in a 50% increase in their programming skills over the course of the program.
- Cultivated a collaborative learning environment, leading to a 40% increase in creative and problem-solving skills among the 30 participants. This resulted in 90% of students reporting improved self-confidence in coding showcased in their capstone projects presentations.
- Curated and organized 15 engaging coding projects, allowing students to practice and apply their skills. These projects resulted in an average 70% completion rate, with 80% of participants reporting increased practical skills and confidence in programming.

Analyst | Deloitte   August 2021 - May 2023
- Led the development and implementation of data privacy and compliance programs, driving a 20% company growth, expanding the user base, and improving revenue streams.
- Reduced audit preparation time by 27% through streamlined privacy and process documentation, resulting in annual savings of $20,000 while maintaining privacy compliance.
- Decreased data breach response time by 40%, saving $100,000 in legal and reputational costs while safeguarding user data and maintaining brand reputation.
- Orchestrated seamless data integration across systems and platforms as a GCP (Google Cloud Platform) data integration specialist.Collaborated with cross-functional teams, translating integration requirements into technical specifications, resulting in improved data accuracy and reduced processing times.

SKILLS

- **Front-End Development:** HTML, CSS, JavaScript, React, Redux, React Native, Swift, TypeScript, Angular
- **Back-End Development**: Node.js, Ruby on Rails, Spring Boot, Java, SQL, Relational Database Design
- **Cloud & Infrastructure:** AWS, GCP, BigQuery
- **Programming Concepts:** Object-Oriented Design, Version Control Systems,Cross-Browser Compatibility

EDUCATION

Flatiron   January 2021 | New York,NY
Full-Stack Software Engineer Certification

Midlands Technical College   June 2017 | Columbia, SC
Associate Degree, Computer Technology
